Contract Research Organization
Specialized in Selective Kinase Inhibitors

& Rational Drug Design
Chemistry Processes for Patentable Leads

Our Expertise

We develop new technologies for drug discovery processes based on our key expertise within computational chemistry, medicinal chemistry, organic chemistry, & ADME/Tox optimization.

Mission

To deliver safe, drug-like novel molecular entities for clients' projects through the application of a unique technology platform & efficient discovery processes. Our commitment is to accomplish this with the highest quality & speed.

Products & Services

COMPUTATIONAL & MEDICINAL CHEMISTRY

HitFast Discovery[®]
Fully integrated drug discovery services

Selective Lead[®]
Multi-target selectivity optimization through molecular statistical design & modeling of the interactions of a group of molecules with several targets

Kinase Inhibitors
Expertise in identification & optimization of selective leads

CHEMICAL SYNTHESIS

Customized Chemistry Synthesis
Expertise in heterocyclic chemistry
Building blocks & intermediates
Focused or diverse libraries

Catalog of Fine Chemicals
Innovative heterocyclic molecules
Online order center

CHEMOINFORMATICS SOFTWARE

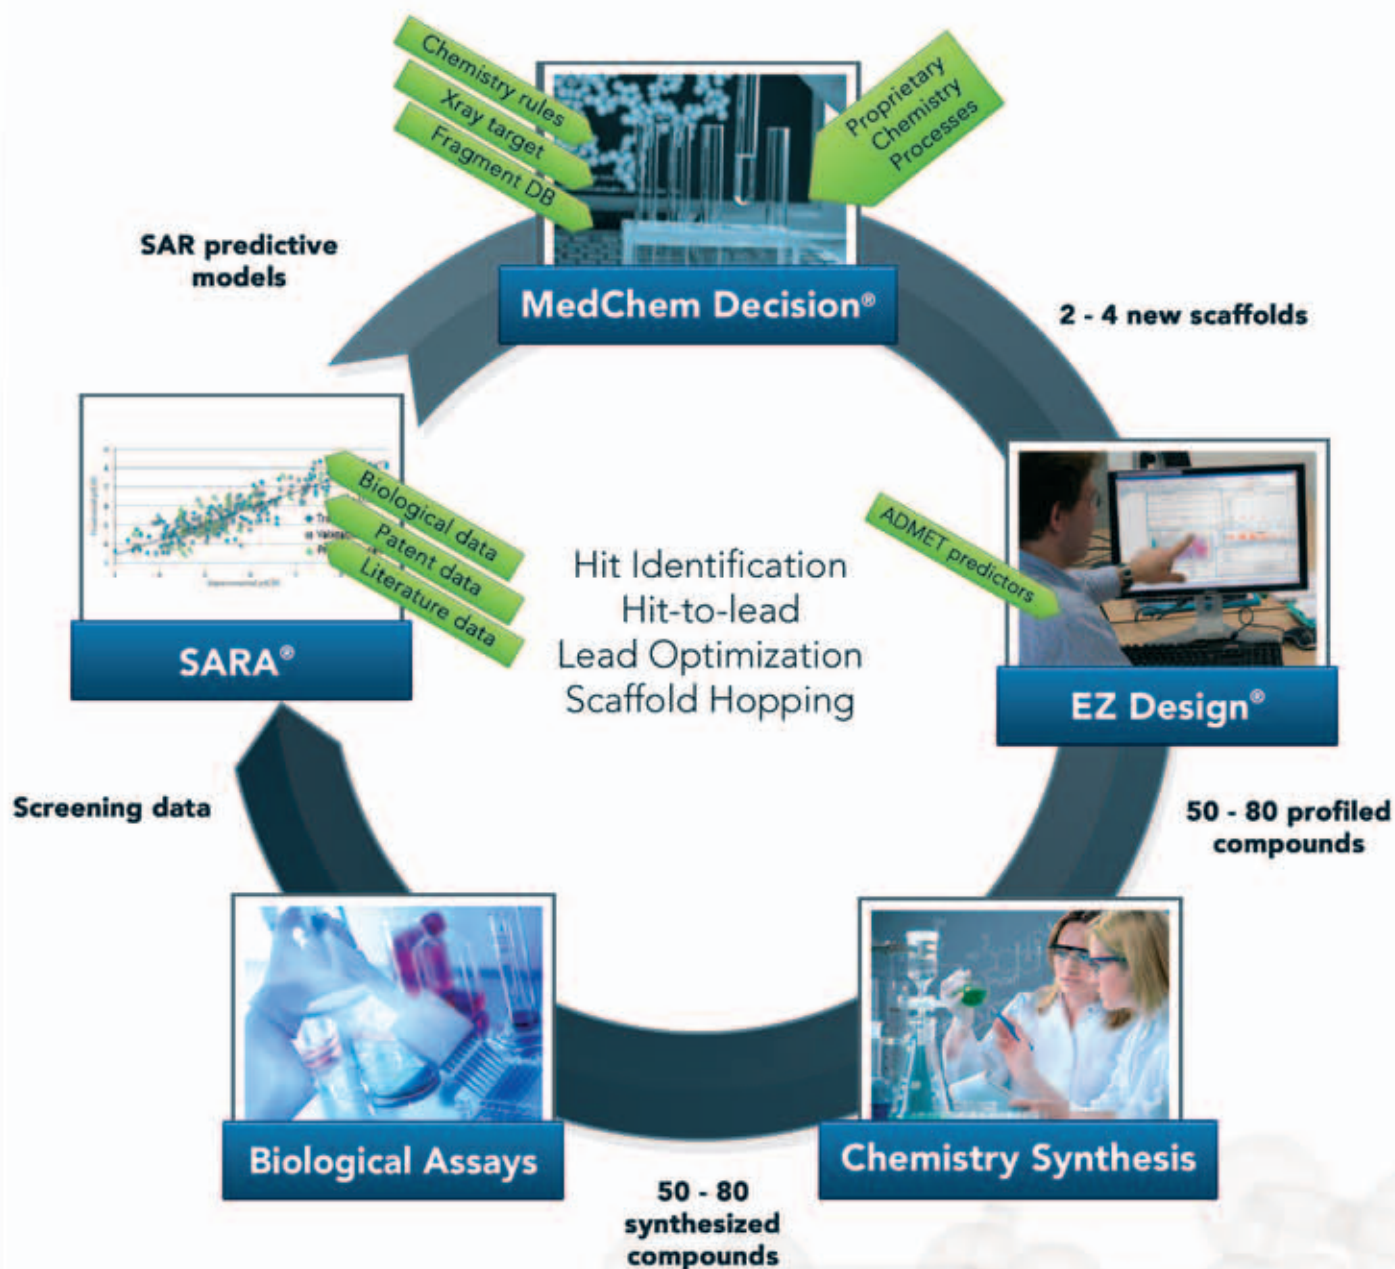

SARA[®] (out-licensed)
Software for Structure Activity Relationships Analysis

EZ Design[®] (out-licensed)
Easy to use software for medicinal chemists; library design & profiling; incorporates ADME/Tox in silico predictive models.

MedChem Decision[®] (in-house only)
Identifies & designs patentable NCEs

The HitFast Discovery® Technology Platform

Integrated Computational & Organic Chemistry Solutions
for Efficient Medicinal Chemistry

Value Creation

Synthetically feasible, patentable & PK/toxicology profiled lead series within 18-24 months, including 2-3 iterations
Current success : 10-20% hit-rate in 4 projects
IP created belongs to the client
Valuable ROI for clients

An Innovative Approach
An Expert Team
A Customized Offer

OriBase Pharma is an international contract research organization (CRO) specialized in the design and chemistry synthesis of kinase inhibitors, and dedicated to accelerating drug discovery processes.

OriBase Pharma
Parc Euromédecine,
1682, Rue de la Valsière
34090 Montpellier, France
